

international roaming

Simple. Accessible.

You need to give your travellers the right tools to work effectively wherever they are, but the cost of making and receiving calls when abroad is a natural concern for multinational companies. If you're buying a messy combination of national roaming offers, things can quickly get confusing – and expensive.

freemove
the Power of Alliance

Now for the good news. FreeMove, an alliance of four leading mobile operators, has changed international roaming to make it simple, predictable and affordable for all of your European users – whether they regularly travel all over the world or tend to work in the same places every time.

Based on a thorough understanding of your fleet size and roaming profiles, your Global Account Manager will create a roaming and international call offer that is tailored to your company's needs and takes advantage of your central buying power.

You can be sure you're getting the best value for money, whether that's Euros, Pounds, Zloty or Krona.

What is FreeMove International Roaming?

FreeMove International Roaming delivers three distinct commercial advantages in calls from your home country to abroad, calls made while abroad and calls received while abroad. Call costs depend on just three things: where the user is when they make or receive a call, where they are calling and how long the call lasts.

Harmonised call structures: simple, clear and competitive rates for all your users based across much of the FreeMove footprint as part of your overall, tailored proposal

Four simple zones: Europe (EU and EEA), Extended Europe, USA and Canada and Rest of the World

Network independence: your users get the same great rates, no matter which local network they happen to connect through

Usage reporting and analysis: better visibility and control over your mobile fleet by adding FreeMove Central Report.

In addition, if a lot of your calling is between colleagues, we can create a Closed User Group to save even more on calls made between your company mobiles through FreeMove International Connect.

What does this mean for you?

We'll get you up and running quickly with no change to your local operations or user experience – prices are simply applied and billed through your local FreeMove provider. You'll feel the benefits immediately.

- Use your central buying power to save on calls in the places you do business most
- Simple and predictable pricing with no up-front charges or hidden fees for call set-up
- Easy to implement with very little day-to-day management needed

FreeMove International Roaming is currently available for your users in Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Hungary, Italy, Lithuania, Norway, Poland, Spain, Sweden, Switzerland and the UK.

The FreeMove alliance

FreeMove is the world's leading mobile telecommunications alliance, working to help multinational companies streamline the management of their mobile services. Formed in 2003, the alliance combines the capabilities of Orange, Telecom Italia, Deutsche Telekom and TeliaSonera along with their strategic partners. FreeMove provides seamless international mobile services, harmonised commercial arrangements, dedicated account support and telecom expense management. This global coverage and local support means companies around the world can manage their mobile fleet more efficiently through the Power of Alliance.
