

data roaming portfolio

Predictable, flexible connectivity.

Mobile broadband, email, business applications, dongles and smartphones all make life easier for people needing to access corporate systems and get on with the job while they're travelling. What isn't so straightforward is buying data services on a country-by-country basis, where tariffs are hard to compare and complex to manage.

As an alliance of four leading operators in Europe, FreeMove was created with the objective of helping multinational companies simplify the management of mobile services. This very much applies to data roaming. To start with, we understand you need a harmonised and transparent plan that maximises your central buying power. We also appreciate that one plan doesn't fit all, because your users vary considerably in terms of where they travel and how often they tend to go.

That's why our portfolio of data roaming offers is easy to purchase and manage centrally, consistent across much of our footprint and tailored to give you the best value for everyone.

From your occasional travellers, to your frequent “jet setters” to your regular globetrotters, we have everyone covered.

Three distinct offers

With the FreeMove Data Roaming Portfolio you can agree prices for your users across much of Europe through your Global Account Manager. Set-up is easy and based around how often your people want to travel, where they tend to go and the type of device they take with them – their laptop or their mobile phone.

FreeMove Weekly or Monthly Bundles

This option provides 5 to 300 MB weekly or monthly data bundles for a flat fee.

- The best value per MB as well as predictable costs: it's as simple as click and connect

FreeMove Daily Passes

A variety of daily passes ranging from 2 to 200 MB - you are only charged when the traveller actually connects.

- Designed for occasional travellers using a laptop or multimedia services on a smartphone

FreeMove International Pay As You Go

A world-wide zoned offer that gets you connected while you are on the move.

- For irregular travellers who need reliable connectivity from their phone or laptop all over the world.

All of our roaming offers are network independent, which means it doesn't matter which network the laptop or mobile phone connects through, you'll still get the same great rate. And because travel rarely stays constant, if your users change their travel patterns, we can adapt their data roaming package from the start of the next bill.

What does this mean for you?

You can now choose the offer that best fits your needs, lowering the risk of bill shock. FreeMove Data Roaming Portfolio will help you to:

- Lower costs for your different types of traveller
- Simplify your cost management thanks to predictable pricing structures and network independence
- Make set-up more straightforward in working with one central point of contact

FreeMove Data Roaming is currently available for your users in Belgium, Denmark, France, Germany, Italy, Norway, Poland, Spain, Sweden, Switzerland and the UK. It also integrates easily with FreeMove International Roaming, our streamlined and cost-effective voice roaming service.

The FreeMove alliance

FreeMove is the world's leading mobile telecommunications alliance, working to help multinational companies streamline the management of their mobile services. Formed in 2003, the alliance combines the capabilities of Orange, Telecom Italia, Deutsche Telekom and TeliaSonera along with their strategic partners. FreeMove provides seamless international mobile services, harmonised commercial arrangements, dedicated account support and telecom expense management. This global coverage and local support means companies around the world can manage their mobile fleet more efficiently through the Power of Alliance.
