remote
access

Access your data. Aywhere.

Remote and mobile working patterns require simple and immediate access to corporate information and resources to stay productive everywhere. In a single day, the same person might connect in the office, at home, at a client site or anywhere in between using a variety of devices. The challenge lies not so much in using the latest smartphones and connectivity options – and there are plenty to choose from – but in how to adopt them most sensibly into your organisation, keeping your security levels high and costs low as part of an your overall device management strategy.

With the collective strength of four leading mobile operators, FreeMove provides a seamless, end-to-end remote access solution. Access to your corporate applications comes with global coverage home or abroad, reliable connections irrespective of location and network, and more efficient management via online reporting tools.

FreeMove Remote Access is specifically designed for multinational companies with centralised procurement processes, providing not just an improved mobile experience for your employees, but also increased visibility and control across your entire mobile fleet and footprint.

Unlock the full potential of remote or mobile working while keeping your mobile strategy on track.

What is FreeMove Remote Access?

This seamless, end-to-end remote access solution gives you instant access to your corporate network and applications from over 117 countries and 675,000 hotspots worldwide.

FreeMove Remote Access provides:

Connectivity

- One unique lightweight software client for your devices across your fleet
- A full range of connectivity options: public and private Wi-Fi, mobile, broadband and dial-up with no configuration necessary
- Automatic pre-selection of recommended networks, based on cost, performance and security
- Ability and recommendations to switch to commercial or free Wi-Fi to avoid paying 3G rates when travelling internationally
- One click connection to a broad range of options
- User authentication based on login/password to authorise users, whether they are business partners home workers or travellers

Reporting

Our reporting mechanisms provide increased visibility via a central web portal for configuration and ongoing management across your entire fleet.

This includes consolidated reporting, breakdown of roaming usage by country as well as over and under-used devices and subscriptions, customisable trend and status reports and a real-time alerts system.

Control

You'll gain a better level of control over network access and application use for your laptops, tablets and handheld devices. This makes it easier to enforce cost and compliance policies and measures as part of your central mobile strategy.

What does this mean for you?

In a world where work is what you do not where you are, FreeMove Remote Access takes away the hassle of staying connected when your people are out of the office.

- Increase productivity and work efficiency by helping your people communicate, collaborate and access information whenever and wherever they are
- Improve your IT department's ability to manage and control connectivity on devices across your enterprise
- Keep things simple with the software, access network, VPN connection, authentication and interconnection you need to your corporate network all managed through one solution

With the FreeMove alliance, you can trust in a single, strategic advisor who can oversee your local and global requirements and make sure they are met.

The FreeMove alliance

FreeMove is the world's leading mobile telecommunications alliance, working to help multinational companies streamline the management of their mobile services. Formed in 2003, the alliance combines the capabilities of Orange, Telecom Italia, Deutsche Telekom and TeliaSonera along with their strategic partners. FreeMove provides seamless international mobile services, harmonised commercial arrangements, dedicated account support and telecom expense management. This global coverage and local support means companies around the world can manage their mobile fleet more efficiently through the Power of Alliance.
