

Central Report

one report. total control.

A clear understanding of your mobile fleet is an important step towards active control over your telecommunication costs. However for many multinational company headquarters it's not easy to get a consolidated view over your countries and business divisions.

WHAT IS FREEMOVE CENTRAL REPORT?

FreeMove Central Report is a secure, web-based reporting portal for Multi-National-Companies that provides a transparent view on telecommunication cost and usage for your international fleet. Based on the billing and usage data of the integrated FreeMove network operators you'll receive an extensive portfolio of reports with aggregations on different levels of granularity to support your business.

FreeMove combines the expertise of four leading operators, each with a sound understanding of local markets, to offer a one-stop solution for monitoring mobile spend and usage more efficiently. Based on the individual needs of multinational companies, FreeMove Central Report provides you with different packages to suit the size and complexity of your organization. Apart from standard reports and customized solutions we also offer a Managed Central Report which helps you to better understand trends and optimization potentials.

YOUR BENEFITS

Detailed overview over telecommunication costs and usage by country and/or business unit
